

N29AUTO Stencil Cleaner

In order to meet your daily SMT adhesive or solder paste stencil cleaning requirements, even for frameless stencils or pumpprint, the N29AUTO is an efficient and innovative solution.

Specially designed to provide high cleaning performance, the stencil is introduced into the loading cell of the equipment and automatically immersed in the upright position and submitted to the superior cleaning performance of perpendicular ultrasound and is perfectly cleaned in just a few minutes. Alternatively, a spray under immersion system can replace the ultrasonic for the cleaning of your sensitive screens or stencils.

Following the cleaning cycle, the stencil automatically rises, passing through sprays of filtered cleaning liquid. It is then dried into the loading cell.

The in-line filtration removes continuously the soil loading and keeps the cleaning medium at high quality levels.

The use of an aqueous product (no flash-point, low VOC content) that makes it possible to separate the residues, ensures a 100% closed loop cleaning process to meet today's economic and environmental demands.

Characteristics:

- ♦ Fully automatic Ultrasonic and/or Spray Under Immersion Cleaning system,
- ♦ No contact with chemistry,
- ♦ Water based process in close loop,
- ♦ Rinsing with filtered cleaning liquid
- ♦ No water,
- ♦ Magnetic driven pumps,
- ♦ Hot air drying system included.

"Plug and Clean"

Technical Data:

GENERAL	
Dimension (Length x Width x Height)	1100 x 700 x 2000 mm
Empty weight	300 kg
Voltage supply	230V Single phase + neutral 50/60Hz 16A ± 5% plug

ULTRASONICS	
Ultrasonic area	550 x 450 mm
Power	750 W max

CLEANING UNIT	
Volume	110-120 Liters
Pumps	2 magnetic driven
Filters	2 standards 20in 5µm filters
Time cycle	4 minutes solder paste; 10 minutes glue

DRYING UNIT	
Crossflow fan maximum flow rate	2 x 17m ³ /h
Heating element	7 elements, 400W each
Time cycle	From 10 to 15 minutes

TOOLS	
Frameless Stencil adaptor	Standard sizes available, special sizes on request
Misprinted boards tool	Maximum area 500 x 500 mm
Squeegee and tools	Stainless steel basket 500 x 40 x 80 mm

Efficient

- Effective cleaning of adhesive or solder paste stencils, misprinted boards and squeegee.
- Contains filtration avoids contamination build up
- Completely automated with PLC and wide touch screen.
- Automated maintenance alarm.

Economical

- Low cleaning process costs
- Evaporation of cleaner minimized by automatic cover.
- Product recycled permanently.
- Minimal maintenance requirements (standard filter cartridges)

It protects the environment
